Manila, Philippines | adrian.navarro@example.com | +63 917 555 1234 | [linkedin.com/in/adriannavarro](https://www.linkedin.com/in/adriannavarro)

PROFESSIONAL SUMMARY

Agile delivery leader with 12 years of experience across consumer electronics, telecom, and enterprise software programs. Experienced in Scrum Master, Release Train Engineer, and Agile coaching responsibilities supporting globally distributed teams. Strong background in release planning, stakeholder management, dependency coordination, and delivery governance.

CORE COMPETENCIES

Scrum • Kanban • SAFe • Agile Coaching • Release Planning • Dependency Management • Stakeholder Management • Risk Management • Jira • Confluence • Azure DevOps • Miro • Jenkins

PROFESSIONAL EXPERIENCE

Lead Scrum Master

Lumina Devices Corporation | Mar 2022 – Present

- Supported three concurrent embedded software teams across Singapore, Poland, Germany, and the Philippines.
- Introduced a standardized onboarding framework adopted by five teams, reducing onboarding time from five months to nine weeks.
- Facilitated quarterly Inspect & Adapt workshops that identified and tracked organizational improvement initiatives.
- Coordinated release readiness activities across firmware, mobile, and cloud platform teams.
- Implemented delivery dashboards using Jira and Azure DevOps, improving leadership visibility into program risks and dependencies.

Senior Scrum Master

Nova Embedded Systems | Jan 2018 – Feb 2022

- Supported two product development teams delivering industrial IoT solutions for North American customers.
- Facilitated sprint planning, backlog refinement, retrospectives, and Scrum-of-Scrums sessions.
- Partnered with Product Owners to improve backlog quality and release predictability.
- Reduced average cycle time by 22% through workflow visualization and WIP management.
- Mentored new Scrum Masters and delivery leads on Agile practices and facilitation techniques.

Systems QA Engineer

Axis Telecom Solutions | Jun 2013 – Dec 2017

- Executed system integration and end-to-end validation testing for telecom infrastructure platforms.
- Developed automated test suites that reduced regression effort by approximately 35%.
- Participated in requirements reviews and defect triage sessions with engineering stakeholders.
- Supported multiple product releases across APAC customer deployments.

KEY ACHIEVEMENTS

- Reduced onboarding duration from five months to nine weeks through a structured enablement framework.
- Established release governance processes supporting more than 150 releases across multiple teams.
- Improved release readiness reporting, enabling earlier identification of program-level risks.
- Facilitated organizational retrospectives resulting in measurable improvements in delivery predictability.

EDUCATION

Bachelor of Science in Electronics Engineering

Technological Institute of Manila | 2009 – 2013

CERTIFICATIONS
